

We bring hospital care to the patient's home.

Our work gives patients and providers an important alternative to the traditional hospital setting by taking acute care treatment into patients' homes. At Contessa, we enable provider organizations and health plans to deliver hospital-level care to patients with non-life-threatening conditions in an environment that has proven to be safer and more affordable than a traditional hospital setting – the home.

CONTESSA'S OUTCOMES

↓35%

decrease in **mean length of stay**

↓44%

OUR EXPERTS

TRAVIS MESSINA, MBA

Founder and CEO

Travis is passionate about treating patients in a setting that best fits their needs, which is often the home. He founded Contessa in 2015 to provide a new standard of

healthcare for providers, payers and patients. Since its launch, the company has partnered with six health systems across the US and continues to grow. Before Contessa, Travis built his career investing in healthcare ventures. He spent time at Martin Ventures, Vanguard Health Systems, Signal Hill Capital and SunTrust Robinson Humphrey.

TOPICS

Finances/Operations

- Value-based care
- Reimbursement policy
- Costs of inpatient care
- Integrated delivery networks
- Bundled payments

Innovation

- The future of healthcare delivery
- Alternative sites of care
- Tech-enabled care
- Hospital staffing and capacity issues
- Pandemic response

MARK MONTONEY, MD, MBA

Chief Medical Officer

Mark has a deep history and passion for geriatric medicine. He was first drawn to Contessa because of its unique and specific delivery of care, which is often

highly beneficial to geriatric patients. In his role at the organization, Mark oversees all clinical operations, including patient safety protocols, utilization management, research and innovation, and physician leadership development. Prior to this role, Mark served as the chief medical officer for Tenet Healthcare, Vanguard Health Systems and OhioHealth, where he practiced internal medicine and geriatrics.

HOW OUR CARE MODEL WORKS

MOST COMMON CARE CONDITIONS

A growing number of insurers are agreeing to cover patients to receive up to 30 days of safe, hospital-level medical care in the comfort of their own home.

The most common conditions Contessa covers include:

- Asthma
- Cellulitis
- COPD
- Dehydration
- Pneumonia
- Urinary tract infections
- Congestive heart failure
- Blood clots (including DVT and PE)
